

OPTIMUS AI GLOBAL

Ground Zero Agents — Full Pitch Deck

www.optimusaiglobal.com/ground-agents

Optimus AI Global Ecosystems Limited builds websites, apps, software, and AI automation for businesses across Nigeria — from the corner pharmacy to the neighborhood hotel. Every build implements real SEO techniques from day one, so it can actually be found, not just admired. This is the complete picture of what we build and what it costs.

What We Build

- Ecommerce websites & apps — full storefronts, cart, checkout, order management.
- Custom software for Windows, Mac & Linux — built for how a business actually runs.
- AI automations — chatbots and workflow tools that take repetitive work off a business's plate.
- Mobile apps — iOS and Android, wherever your customers actually are.
- Games — from brand-promotion mini-games to full interactive experiences.
- Fintech applications — for businesses with the proper regulatory structure in place (see the compliance note below).

Featured Case Study — Hotel Management System

- A real, live example: guest booking website, a staff operations app (iPhone & Android), and a manager/owner dashboard (Windows or Mac) — all in one system.
- Complete Hotel Package: NGN 800,000 — includes 5 days of hands-on, on-site integration at the property.
- See the dedicated Hotel Package Quote PDF for the full breakdown.

Investment — Every Build Type

- Static Webapp — NGN 200,000: a professional, fixed-content site, no login or database.
- Interactive Website / Webapp — NGN 250,000 to 350,000: forms, bookings, dashboards, real backend.
- Custom App Build — NGN 600,000: a bespoke mobile or desktop application.
- Software (Windows & Mac) — NGN 1,500,000: full desktop software builds, cross-platform.
- Fintech Application (Full Structure Support) — NGN 8,000,000, minus government fees.

Fintech Compliance Requirement

- A fintech application cannot legally be built without proper regulatory registration from the Corporate Affairs Commission (CAC), including a minimum share capital of NGN 100,000,000. We do not build fintech products for clients without these documents in place — no exceptions.

How It Works, Every Time

- Frontend: a fast, modern, fully responsive build — looks right on phone, tablet, and desktop.
- Backend: a real database where it's needed, not spreadsheets or paper.
- Security: every sensitive action is checked on the server, not just hidden in the interface.
- SEO: built in from day one, not bolted on after launch.

Starting From

NGN 200,000

Every price above is scoped to the specific business before work begins — this deck is a starting point for the conversation, not a final invoice.

Optimus AI Global Ecosystems Limited — we build the future of African business, one business at a time. Think Tech. Think Optimus AI.
