

OPTIMUS AI GLOBAL

Custom App Build — Quote

www.optimusaiglobal.com/ground-agents

A bespoke mobile or desktop application, built around exactly how your business operates.

What's Included

- A custom-designed app for the platform(s) your users are actually on — iOS, Android, or desktop.
- Built around your specific workflow, not adapted from someone else's template.

How It Works

- Frontend: a native or cross-platform app interface, designed for how your users actually work.
- Backend: a real server and database powering the app, so data syncs across every device.

Investment

NGN 600,000

Final price depends on platform(s) and scope — agreed before work starts.

Delivered remotely — no on-site visit required. Hosting/backend costs billed separately, at cost.

Optimus AI Global Ecosystems Limited — we build the future of African business, one business at a time. Think Tech. Think Optimus AI.
