

OPTIMUS AI GLOBAL

Interactive Website / Webapp — Quote

www.optimusaiglobal.com/ground-agents

For a business that needs more than a brochure — real forms, bookings, logins, or a dashboard backed by a real database.

What's Included

- Everything in the Static Webapp tier, plus real interactivity: bookings, order forms, user accounts, or a management dashboard — scoped to what your business actually needs.
- Data is stored centrally in a real database, not just displayed — so it's there the next time you or a customer comes back.

How It Works

- Frontend: a fast, modern, fully responsive web application.
- Backend: a real server and database, handling whatever your site needs to remember or process.
- Security: access to any sensitive area (admin, staff, accounts) is checked on the server, every time.

Investment

NGN 250,000 – 350,000

Final price depends on scope — the exact feature set is agreed before work starts.

Delivered remotely — no on-site visit required. Hosting/domain costs billed separately, at cost.

Optimus AI Global Ecosystems Limited — we build the future of African business, one business at a time. Think Tech. Think Optimus AI.
